News #1: Cybercrime training planned for Jaipur police
After successfully cracking down on cyber crime, the Jaipur crime branch is planning to provide training to investigate such cases to policemen in four police districts of the city.

News #2: As net use spreads, cyber crimes up 19 times over 10 years
Cyber crimes reported in India rose 19 times over the last 10 years (2005 to 2014), from 481 in 2005 to 9,622 in 2014. India is now ranked third - after the US and China - as a source of "malicious activity" on the internet, second as a source of "malicious code" and fourth and eight as a source or origin for web attacks and network attacks.
